

Bring Colour to the Kitchen with Mitsubishi Electric's new Red or Onyx Black Fridge

2015-08-18

Mitsubishi Electric Australia announced today the release of the 406 litre bottom mount refrigerator in Red or Onyx Black, using colour to complement the design and palette of your kitchen.

These refrigerators are not only stylish when it comes to appearance but also have the functionality to provide compact, practical compartments and cool features including:

- An upside-down design places the large vegetable and freezer drawers at the bottom of the fridge
- A three-way flexible shelf system allows you to flip the lower shelf back creating higher space to store bulky items like Christmas hams and wine casks
- A non-plumbed automatic ice maker with easy-clean components.

"The 406 upside models in white and stainless steel were well received by our customers, who loved the convenient features" says Raja Gounder, General Manager, Mitsubishi Electric Australia. "In recent years, we've seen bold colour statements start to become part of the kitchen space. One area where we can help customers remain true to their bold designs is by providing them with one of our popular models in Red and Onyx Black as well, so they have a greater choice and can create their own unique kitchen space."

All Mitsubishi Electric refrigerators are backed by a five year warranty.

Available models (375 litre / 406 litre)
